

Senescence: Dominant Or Recessive In Somatic Cell Crosses

by Warren W Nichols; Donald G Murphy; N.J.) Institute for Medical Research (Camden

Dec 12, 2012 . The underlying theme of the workshops is the use of cultured cells in a variety of somatic cell genetic systems designed to define mechanisms Cellular Senescence and Somatic Cell Genetics - NUKAT Prosto . Ageing-related Books - JenAge Information Centre Somatic cell - Dictionary and Translator lexbook - Synonyms of . Series: Cellular Senescence and Somatic Cell Genetics. Subjects: Medicine. Senescence Dominant or Recessive in Somatic Cell Crosses? / by: Nichols Senescence : Dominant or Recessive in Somatic Cell Crosses? Robertson, T. B., Chemical Basis of Growth and Senescence, Philadelphia (1923). MUTATION some form of somatic segregation involving a loss or shift of dominant subsequent multiplication of this deficient cell, allowing recessive genes . to a recessive condition in cross-fertilized seeds, where the alteration affects. Senescence [print] : dominant or recessive in somatic cell crosses . Senescence : dominant or recessive in somatic cell crosses? / ed. Warren W. Nichols, Donald G. Murphy. Adres wydawniczy. New York ; London : Plenum Press Senescence: Dominant or Recessive in Somatic Cell Crosses .
